### What they have shipped

### Pricing

| | |
|---|---|
| **Free** | 300 credits a day, 1,500 a month cap[13] 3P |

| **Team** | From $20 a seat; annual saves ~17%[15] 3P |
| **Add-on** | Cloud Computer, $30 or $50[16] UV |

**The catch:** one task can cost 200 to 9,000 credits,[17] and unused monthly credits are cleared at renewal.[18]

| | | |
|---|---|---|
| App Store | About 39K ratings[19] RV | 4.7 |
| G2 (two views) | vs 2.5 from 6 on the listing I read[20,21] UV | 4.3 |
| Trustpilot | 210 reviews, 94% one-star, 176 in last 12 months[18,19] RV | 1.2 |

**Win on**
Finished slides, sheets and docs from one workspace, plus native Microsoft 365 plugins.[25,26]

**Be careful on**
Credits and support complaints on both sides. Trustpilot currently withholds our rating.[27,18]

**Watch for**
Buyers who need hours-long autonomous runs or an agent inside their logged-in tools.[22,12]

## Their weakness, our counterpoint

| What they struggle with | | What we say | Stance |
|---|---|---|---|
| Credits drain on failed or looping tasks[18] | → | We get credit complaints too.[25] Safer line: chat and images cost 0 credits on paid plans through 31 Dec 2026.[28] | Careful |
| Cost per task is unpredictable (200 to 9,000 credits)[17] | → | Pilot on their real task. One 10-slide deck test used about 244 credits.[29] | Press |
| Trustpilot 1.2; 94% one-star[18] | → | Don't compare scores: Trustpilot withholds ours.[27] Use G2 4.3 from 20 reviews.[30] | Careful |
| Support is mostly bots; refunds drag[18] | → | Reviewers praise our response time,[27] but we have suspension and refund complaints too. | Press |
| Ownership uncertain after the Meta unwind[6,7] | → | Raise it as a procurement question only. Our own origins draw scrutiny.[31] | Careful |

## Their strength, our response

| Where they are good | | What we do | Stance |
|---|---|---|---|
| Hours-long autonomous sessions[22] | → | Concede. Redirect to time-to-finished-deliverable. | Concede |
| Works in the customer's own logins[12] | → | We have an AI browser with autopilot *(from your brief; no public link yet)*. Say "comparable". | Careful |
| Wide Research: 100+ parallel agents[10,32] | → | No public equivalent found. Don't claim parity. | Concede |
| Cheaper entry: $20 vs our $24.99[8,29] | → | We're 25% higher at entry, 50 to 75% at team level.[15,33,25] Reframe to cost per finished deck. | Careful |

### Landmine questions to plant early

1. "How do you forecast what a task will cost before it runs?"[17]
2. "What happens to unused credits at renewal?"[18]
3. "Who owns the vendor today, and does that pass procurement?"[7]

### Discovery: ask, then listen → answers p.4

"Is your output mostly decks and docs, or open-ended research?"
"Does the agent need to work inside tools you're logged into?"

### Objections to expect → scripts p.4

"Manus is cheaper." "Your reviews are bad too."
"Manus runs longer tasks." "Who owns you?"

### When we win

- **Decks and reports.** "Presentations are well designed and 80-85% accurate."[27] Lindy's top-saved-time feature.[25]
- **Multi-format, one workspace.** Slides, sheets, docs, media; G2 reviewers praise AI Slides and multi-step research.[25,30]
- **Work inside Office.** Native PowerPoint, Excel and Word plugins; no Manus equivalent found.[26]
- **Enterprise checks.** SOC 2 Type II, ISO 27001, SSO listed on our business page.[33] CR

### When we lose

- **Big parallel research.** Manus Wide Research is built for tens or hundreds of items.[32]
- **Predictable cost.** Lindy's main drawback; Call for Me alone is 500 credits a call.[25]
- **Sticker price.** $24.99 vs $20 at entry.[8,29]
- **Creative editing and export polish.** One 2-star review says edits were ignored; Lindy had two exports lose formatting.[27,25]

### Discovery: Q1. "Is your output mostly decks and docs, or open-ended research?"

**If decks, docs** "That's where we're strongest. Let's build one real deck from your own material and compare." Backed by Trustpilot and Lindy feedback on AI Slides.[27,25]

**If research** "What does the research end up as: a report, a sheet, a deck?" We win if it ends as a deliverable. For very large parallel research, be honest that Manus has Wide Research.[32]

**Listen for** *Decks, recurring reports and client-ready output point to us. Hundreds of items researched in parallel points to Manus.*

### Discovery: Q2. "Does the agent need to work inside tools you're logged into?"

**If yes** "Manus's Browser Operator does this. We have an AI browser with autopilot; let's test your exact tools."[12] *Don't claim we are better.*

**If no** "Then the question is the finished output, and that's our strength."

**Also ask** "Do your people live in PowerPoint, Excel and Word?" We have native plugins for all three.[26]

### Objection 1. "Manus is cheaper."

**Acknowledge** "On sticker price, yes: $20 against our $24.99 at entry."[8,29]

**Reframe** "The real cost is per finished deck. One task on Manus can run 200 to 9,000 credits."[17]

**Ask** "Can we run one real task on each and compare the credits and the result?"

### Objection 2. "Your reviews are bad too."

**Acknowledge** "Fair. Credit complaints appear for both products."[25]

**Reframe** "On G2 we're 4.3 from 20 reviews, and users single out AI Slides and research."[30,25] *Never quote Trustpilot against Manus: it withholds our score.*[27]

**Ask** "Which task would worry you most? Let's test that first."

### Objection 3. "Manus runs longer tasks."

**Acknowledge** "For long autonomous runs, that's right."[22]

**Reframe** "If the goal is a polished deliverable, that is where we're strongest."

**Ask** "How long do your tasks run today?"

### Objection 4. "Who owns you? Is this safe?"

**Answer** "We're based in Palo Alto,[26] and list SOC 2 Type II, ISO 27001 and SSO on our business page.[33] Happy to share details in procurement." *Some third parties note China-founded but US-based, so expect the question.*[31]
